

USER INTERFACE DESIGN & STORYBOARD

The storyboard portion of the project requires you to put your thinking cap on as you begin to design the layout of your project.

Project Information
Design illustration created with Adobe Illustrator CS4 and Photoshop CS4 as a project to convey students ability to manipulate images. Images used were provided by student of her and her husband with addition to a creature image from Avatar.

constant color rollover color visited color drop color

right sidebar will change color according to page w/tabs to show pages
drop down button will change color to teal
roll over button will change color green (gain attention)
visited button will remain orange in color

Background fill pattern above... result below

Sidebar

The images will be displayed as below creating the look and feel of a professional museum with artwork categorized. The categorization will be determined by technique, typography, color palette, artistic ability, pattern, etc. On click or rollover the viewer will be able to have a pop up screen display a larger image to view the item in displays and its details.
