Deliverables

The following deliverables are for a project focused on researching and analyzing AI usage within the arts and its effects on the creators and users. The final product will be a guide on responsible use of AI within this field.

1. Project Initiation and Research

- Literature Review Summary: Document summarizing initial findings from academic literature, reports, and case studies on AI in creative fields.

- Key Topics Report: Initial report outlining identified key topics, including AI's impact on visual arts, music, and content creation..

- Source List: Compiled and annotated list of sources reviewed during the initiation phase.

2. Research and Literature Review

- Analysis Report: Document outlining key ethical concerns, including authorship, copyright, and bias. Detailed explanation on how generative AI works.

- AI Tool Selection and Testing Plan: List of selected AI tools (3-5) with a detailed plan for testing various scenarios.

- Personas for testing: Create 3-5 personas to use while testing AI tools.

3. Stakeholder Interviews

- Interview and Survey Transcripts: Transcribed or summarized data from conducted interviews and surveys.

- Preliminary Interview Analysis Report: Initial report identifying recurring themes and insights on ethical challenges and opportunities.

4. Testing

- AI Tool Testing Report: Detailed report on results from testing scenarios applied to the selected AI tools, including data and findings. Video demonstrating testing for website content.

5. Guideline Development

- Comprehensive Data Analysis Summary: Consolidated summary of findings from all data sources, including surveys, interviews, case studies, and tool testing.

- Draft of Responsible Guidelines Proposal: Initial draft of the proposed guidelines for AI use in content creation, based on research findings.

- Final Draft of Guidelines: Links to allocated sources, cases, furthering information attached on the guideline.

6. Final Project Report and Presentation

- Final Guideline Webpage: Front-end website prototype used as a guideline resource for responsible use of AI within the arts.

- Final Project Report: Complete report including literature review, interview findings, case study summaries, testing results, and guidelines.

- Presentation: Video presentation of findings and walkthrough of guide webpage.
