Success Measurements

1. **Project Planning & Research**
   - Define project scope and requirements
   - Research technology stack (MySQL, backend framework, frontend tools)
   - Create wireframes and design mockups
   - Develop project timeline and milestones
2. **Frontend Development**
   - Build homepage with navigation
   - Create family member profile pages
   - Implement login/signup UI
   - Design subscription UI
   - Ensure responsiveness across devices
3. **Backend Development**
   - Set up MySQL database
   - Implement user authentication (login/signup)
   - Develop API endpoints for data retrieval and updates
   - Create subscription management system
   - Handle security and data encryption
4. **Integration & Testing**
   - Connect frontend with backend
   - Conduct unit testing for each module
   - Perform integration testing
   - Gather user feedback and fix bugs
   - Optimize website performance
5. **Deployment & Maintenance**
   - Set up hosting environment
   - Deploy database and backend services
   - Deploy frontend
   - Perform final testing
   - Create documentation for maintenance and future updates
