Scenarios Design

With all the tasks stated in the task analysis, we can create a scenario for all of them. We selected the most important scenarios that can happen when a customer or a manager get in touch with the website of Airfly Corporation. Those scenarios are put in evidence below. In the same way, user will be able to leave feedbacks by clicking on the link “Feedback” in the navigation bar

Customers

❖ To get a specific drone information, the user has to get first to the home page when he/she will tape the website link in the browser. There, the user has to click on the link called “Products” in the navigation bar located on the right side of the webpage. The user will have to click on the wanted product to get to a webpage where all its information is listed.

❖ The navigation bar is the turning point and is unavoidable to go through the website. To leave a feedback, the user just has to click on “Feedback” in the navigation bar, fill the box and then submit the form.

❖ To buy a drone, the customer has to click on “Order” from the navigation bar, fill the form and submit it in order to complete the order.

❖ To see the company information, the link “About Us” is related to the place where the visitor will find what he/she needs to know about the company.

❖ To see the company contact, the visitor will have to click on “Contact Us” in the navigation bar from the homepage as always.
Manager

The actions of the manager will be only to manage the staff of the store. On the home page, the manager has to click on the link “Administration,” authenticate himself/herself, and will get to the different options that he/she can operate, which are add a new employee, list the employees’ information, list newsletter subscribers, and list feedbacks from visitors.
